**GISAERO**  
LOGISTICS | ENGINEERING | SUPPORT

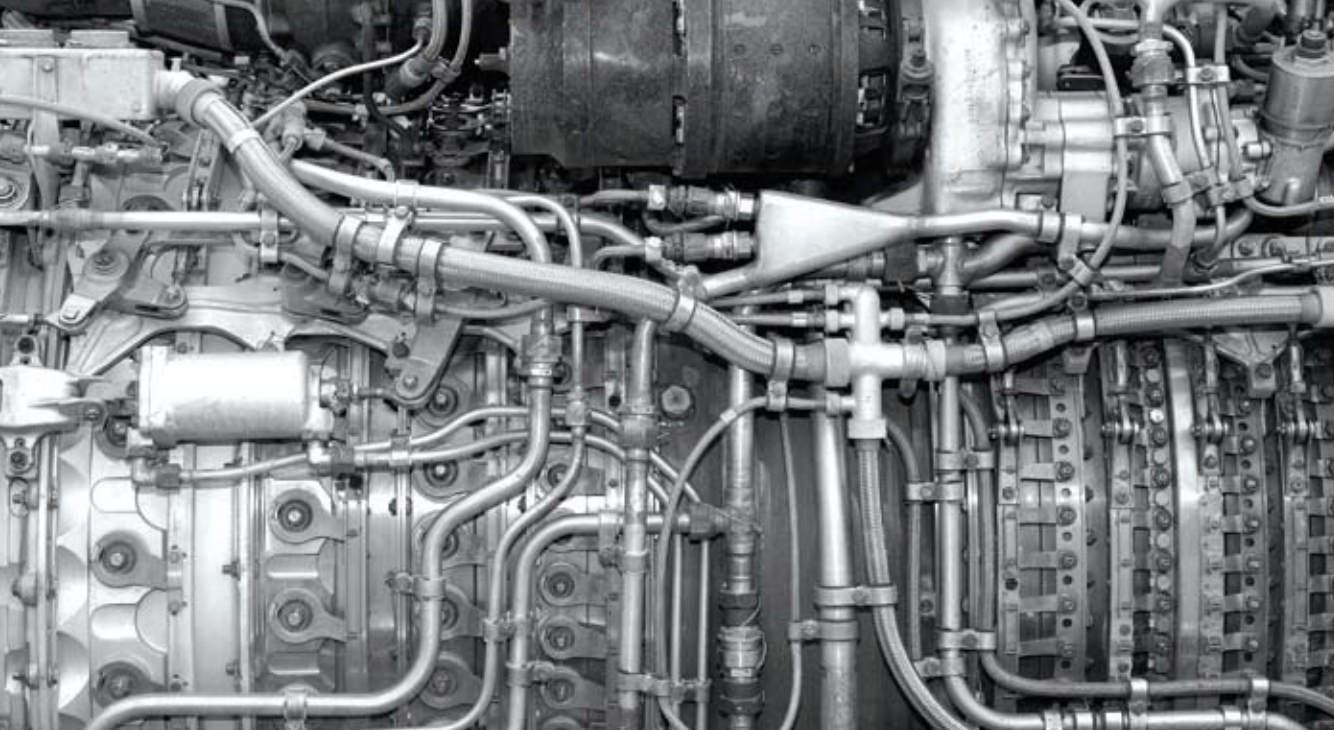

GIS Aero is a division of Goodwill Industries of Fort Worth. Goodwill was founded on the idea that a commitment to quality work creates employees with self-esteem and leads to a better society. You can be sure that same commitment still runs deep in our organization. We promise skilled employees, precision in our execution and the utmost attention to detail. With more than 30,000 square feet of customizable production space, 1,000,000 square feet of facility space and more than 600 employees, we're ready and able to handle any project your business needs.

# GIS AERO

GIS Aero provides high quality, competitively priced logistical support, kitting and reclamation services to commercial, military and DoD companies. GIS Aero has served American Airlines for more than a decade. Other Goodwill programs across the country contract with major industry brands, like Cessna, Gulfstream, Boeing, Thayer Aerospace and Hawker Beech Craft.

## LOGISTICS

GIS Aero is committed to providing your company with the highest standards of comprehensive logistical support while maintaining superior quality and on time delivery. Whether the project is a complex logistical and kitting one for a military or DoD customer or a simple reclamation and reprocessing job for a commercial airline, customer satisfaction is always our No. 1 priority. GIS has the knowledge and capabilities to handle all levels of logistical support, from acting as a supply and distribution center with integrated organic purchasing and quality capabilities to acting as a forward stocking location that provides assembly and delivery of completed manufacturing kits on a JIT (Just In Time) basis.

GIS Aero is a top tier logistics and support supplier that provides streamlining of processes and incorporates the latest lean manufacturing, six sigma and 5 S practices to make us the most efficient and cost-effective partner for your operation.

## ENGINEERING

GIS Aero evaluates every customer's project from start to finish to help them better understand not only what the desired outcome is but also to help identify and eliminate any waste present in the process. GIS Aero prides itself on the ability to view a project or program with a fresh set of eyes, which allows us to offer multiple solutions to a given challenge. GIS Aero's ability to design, engineer and implement product flow rate analysis to help determine whether there could be a more efficient solution is one of many ways that we work as an integral part of your team.

Whether our engineer staff designs a kitted shadow box layout with your production staff's workspace in mind or creates a product floor model before production begins, GIS Aero constantly focuses on efficiency and value added production engineering. We also have the ability to engineer and model even our customer's most complex projects and components using the latest drawing and 3D modeling software. This cutting edge technology meets the demands of even aerospace's most demanding customers.

## SUPPORT

GIS Aero supports all of its clients with the dedication, respect and hard work expected throughout the aerospace industry. In addition to being a non-profit business, GIS Aero is a division of Goodwill Industries of Fort Worth. At GIS Aero, 85 percent of our staff members have some form of physical or mental disability, and we're focused on creating a workplace that incorporates new opportunities for disabled veterans. Our current business and growth model at GIS Aero establishes that for any jobs we create 50 percent will be earmarked for disabled veterans.

When you work with GIS Aero, you get not only the highest level of expertise and service in the aerospace industry, you also help create jobs to better your local community.
